NEXORA

Work Less. Think More.

⚠ ILLUSTRATIVE / CONCEPT PROJE

Series A Investor Presentation · 202

Portfolio sample — all data is illustrative. Not a real company or in

01 — PROBLEM

Knowledge work is broken.

Professionals spend most of their day on low-value repetitive tasks — not actual thinking.

40%
of work hours lost to repetitive, automatable tasks

$1.8T
annual productivity loss in the US alone (McKi

The root cause: Existing tools automate isolated actions but fail to understand *context* — so every copy-paste between apps, and re-explain the same thing dozens of times a day.

Illustrative / Concept Project — data is representational

02 — SOLUTION

An AI layer that thinks with you.

NEXORA connects to your existing tools and handles the connective tissue of work — so yo

⚙️

Automate

AutoFlow maps your recurring workflows and executes them end-to-end — no code, no scripts, no manual triggers.

🧠

Augment

NexAssist is your context-aware AI copilo knows your projects, your team, and your — answering and acting, not just suggest

Core differentiator

Illustrative / Concept Project

03 — MARKET OPPORTUNITY

A $47B total addressable market.

The enterprise AI productivity software market is growing at 28% CAGR through 2030.

TAM — Total Addressable Market

Enterprise + SMB AI productivity software globally

SAM — Serviceable Addressable Market

English-language SaaS buyers — professional services, tech, finance

SOM — Serviceable Obtainable Market

Realistic 5-year capture at current growth trajectory
