ABOUT

About MDA

The Agency Built for Growth-Stage Businesses in Dubai

Master Digital Agency is a full-spectrum digital production studio operating under the DREXONYX brand. We build websites, produce media, develop brand identities, and deliver business-grade digital infrastructure for companies operating in Dubai's most competitive sectors.

We work with contractors, facility companies, manpower agencies, and professional services firms that need production-quality output on a fixed scope, fixed price, and defined timeline — no retainers, no uncertainty, no revision loops.

Every MDA client receives a written brief before work begins, approval gates before execution, and full asset ownership on delivery. We are built around one principle: businesses deserve agency work, not agency process.

1. **Written Brief.** Every project starts with a documented scope. No verbal commitments, no assumption of requirements.
2. **Approval Gates.** You sign off at every key stage. Nothing is built without your explicit go-ahead.
3. **Full Ownership.** Source code, brand files, media assets — everything transfers to you on handover, no strings attached.
4. **Fixed Pricing.** The fee is agreed before a single file is opened. No hourly billing, no revision charges, no hidden costs.

SERVICES

Core Services

Four integrated service pillars. Every project draws from all four — no siloed deliverables, no coordination overhead.

01

Digital Solutions

Custom website development and digital infrastructure, scoped to a fixed delivery with no open-ended cycles.

- 5- to 20-page websites built from scratch to brief
- Landing pages with conversion-optimised layouts
- WhatsApp integration, quote forms, booking flows
- Full mobile and tablet optimisation included
- SEO foundations, Google Analytics, sitemap setup
- Full codebase handover — you own every file

Website Development | Landing Pages | SEO Setup | Mobile Optimised

02

Creative Services

Brand identity and visual systems developed for your sector — from logo to print-ready asset pack.

- Logo design with 3 directions presented for approval
- Complete brand guide: colours, fonts, usage rules
- Business cards, letterheads, email signatures
- Social media cover sets and profile graphics
- Presentation templates in PowerPoint / Google Slides
- Print-ready files in all required formats

Brand Identity | Logo Design | Print Materials | Brand Guidelines

03

Media Production

Professional photography and video produced on-location across Dubai, delivered post-production ready.

- Location photography: team, premises, service shots
- Brand video (60–90 sec) for website hero or social
- Drone footage for construction and site projects
- Social content pack: reels, stories, thumbnails
- Full post-production and colour grading included
- Delivered as web-optimised files on handover day

Photography | Video Production | Post-Production | Social Content

04

Business Solutions

Operational digital tools that automate enquiry handling, quotation, and client communication.

- Client portals with login, job tracking, document access
- Online quotation systems with PDF output
- CRM-lite tools: lead capture, follow-up triggers
- Arabic/English bilingual interface support
- Admin dashboards for job status and client records
- WhatsApp and email notification integrations

Client Portals | Quote Systems | Process Automation | Admin Dashboards

INDUSTRIES

Industries We Serve

MDA's production system is pre-adapted for Dubai's highest-demand business sectors. Each vertical receives sector-specific content, visuals, and positioning — not generic templates.

Construction & Engineering

Contractors · Site management · Project developers

Company profiles, project portfolios, RFQ systems, Arabic/English sites

Facility Management

Cleaning · Maintenance · Operations companies

Service catalogues, quotation flows, staff showcase pages

Manpower & Staffing

Labour supply · Recruitment · Workforce solutions

Applicant portals, sector pages, bilingual onboarding flows

Real Estate Development

Developers · Brokers · Property management

Project listings, floor-plan galleries, lead capture systems

Hospitality & Tourism

Hotels · Restaurants · Travel experiences

Menu sites, booking integrations, gallery and review pages

F&B & Restaurants

Chains · Cafés · Catering & delivery

Online menus, WhatsApp ordering, branch location pages

Healthcare & Clinics

Clinics · Physiotherapy · Medical centres

Service listings, appointment booking, DHA-compliant content

Retail & E-Commerce

Physical stores · Online brands · Markets

Product catalogues, cart integrations, promo landing pages

Events & Entertainment

Corporate events · Production companies

Event landing pages, registration forms, portfolio sites

Transport & Logistics

Freight · Last-mile delivery · Fleet

Quote calculators, route zone maps, fleet showcase pages

Education & Training

Training institutes · Online academies

Course catalogues, enrolment flows, certification pages

Professional Services

Consultants · Law firms · Financial advisors

Authority sites, case study pages, contact & retainer flows

FULL PACKAGE · ESTABLISHED COMPANIES

CUSTOM QUOTE AVAILABLE

Every package is scoped to your business — not a template.

PROCESS

How We Work

MDA operates on a four-gate production system. Every project moves through the same four gates in the same sequence — discovery, design, build, and launch. Nothing skips a gate. Nothing starts before the previous one closes.

This discipline is how we protect your budget, compress your timeline, and eliminate the rework that consumes most agency-client relationships before the product even ships.

"Every project has a brief. Every brief has a gate. Every gate has a sign-off."

01 Discovery & Brief

We map your business goals, target market, and commercial opportunity in a structured discovery session. The outcome is a written brief that defines deliverables, confirms audience, and locks the project timeline. Nothing moves to design until the brief is finalised and signed. We also conduct a competitor audit and identify the key content pages your sector requires.

Business Brief | Competitor Analysis | Fixed Timeline | Scoped Deliverables

02 Design & Approval

Every touchpoint is crafted specifically for your brand — visual identity, UX wireframes, and messaging aligned to your audience. We present three design directions before any build begins. Nothing proceeds to development without your written approval. Design rounds are time-boxed so the project stays on schedule.

Wireframes | 3 Design Directions | Approval Gate | Visual Identity

03 Build & Execute

We execute across all disciplines simultaneously — frontend development, content setup, and media creation delivered on brief and on schedule. Parallel execution compresses timelines without quality trade-offs. Weekly status updates keep you informed at every stage of the production cycle.

Development | QA & Testing | Weekly Updates | Parallel Execution

04 Launch & Handover

We manage the full go-live — DNS, hosting configuration, and deployment to your infrastructure. On launch day you receive the complete codebase, all creative assets, and a written handover brief. Every MDA project includes 30 days of post-launch support as standard at no extra cost.

Full Handover | DNS & Hosting | 30-Day Support | Asset Ownership

WHY MDA

Why Choose MDA

Brief-to-Delivery Speed

MDA's production infrastructure enables rapid turnaround without sacrificing quality. Most projects move from a signed scope to first deliverable within seven working days — a benchmark few agencies at this price point can match. Our parallel-track execution model means design, content, and development run simultaneously, not sequentially.

- Scoping call to first draft in 3 working days
- Design, content and development run in parallel
- Fixed milestones on every signed scope — no open-ended cycles

7-day avg delivery · Fixed timeline on every scope

Multi-Sector Expertise

We have pre-built, sector-adapted systems for construction, cleaning, and manpower businesses. Your industry's specific terms, content needs, and audience expectations are already built into our production workflow before work begins. No learning curve. No generic copy-paste that reads like every other agency's output.

- 12 active sector verticals with ready content systems
- Arabic/English bilingual output for UAE-facing businesses
- Pre-built compliance and regulatory language per sector

12 sectors covered · UAE-specific content systems

Full-Spectrum Output

A single MDA engagement delivers website, brand identity, media assets, and business tools as one coordinated package. No briefing multiple suppliers, no version conflicts, and no misaligned output between disciplines. One point of contact. One invoice. One handover.

- Website, brand, media and tools in one coordinated brief
- All assets export-ready and client-owned on handover day
- No version conflicts — one team, one visual language throughout

Website + brand + media + tools · One engagement

Transparent Pricing

Every project is scoped with a fixed fee before work begins. There are no hourly rates, no revision fees, and no surprises on your final invoice. You approve the brief; you approve the cost; you own every asset we produce. AED 599 to AED 1,899 — all-inclusive, no hidden extras.

- Fixed fee agreed before a single file is opened
- Revision rounds included — no extra invoices mid-project
- You own the code, the brand files, and every asset produced

Fixed fee · No hourly billing · Full asset ownership

30-Day Support Guarantee

Every MDA project includes a 30-day post-launch support period as standard. Bugs are fixed, changes are handled, and the site is monitored — at no additional cost — for the full first month after go-live. Most issues are resolved within one business day. Premium projects include 90 days.

- Bug fixes and copy changes at no charge within the window
- Most requests resolved within one business day
- Premium projects extend to a 90-day support window

30-day standard · 90-day on Premium · No extra charge

Results, Not Reports

We measure success against the original brief — not against activity metrics. Every project closes with live, working output deployed and confirmed against its stated commercial objectives. The brief is the contract. Deliverables that miss the brief are reworked, not invoiced.

- Deliverables signed off against the original brief, not hours logged
- Off-brief output is reworked at no additional cost
- No dashboard reports — the live site is the evidence

Output vs. brief · Rework if off-brief · No activity KPIs

"The difference between an agency and a production partner is whether they share your risk. At MDA, we take responsibility for the output — not just the process."

— MASTER DIGITAL AGENCY · DUBAI, UAE

WHAT HAPPENS NEXT

1. **Submit Your Brief**
   Visit drexonyx.studio/start-project and complete the short brief form — takes 5 minutes.
2. **Receive Your Scope**
   We respond within 24 hours with a written scope, timeline, and fixed price. No obligation.
3. **Approve & We Build**
   Approve the brief and we begin production immediately — discovery session scheduled same week.
4. **Launch & Own Everything**
   We go live, hand over all assets, and provide 30 days of post-launch support as standard.
